

Mug Pro Testimonials

The people that like the Mug Pro Plus best are those that have used other presses first. Unfortunately, by the time you understand a technology well enough to make a wise equipment choice, you have already bought the wrong equipment. Testimonials from actual users are more important than any advertisement you might read. So here you go...

"I just received my Mug Pro press and love it! I have worked with several other mug presses in the past and can't understand why anyone wouldn't buy the Mug Pro. The first thing I was impressed by was its' rugged construction. The Mug Pro never fails. I also like the ease of use and convenient location of all the controls. I can quickly go from the standard 11 ounce, to the El Grande, to the extra large stein, without complicated changes to the press. The Mug Pro is the best mug press I've ever used. It's a winner."

Richard S. Paul, The RSP Group, California

"I have been using Nova Chrome's Mug Pro mug press for almost 5 years now. After thousands of mugs and almost daily use it still works perfectly. Many thanks to all of the wonderful people at Nova Chrome and their gem of a mug press!"

Mitch Robinson, Sierra Custom Design, California

"You really don't know how good it feels to be confident of making a good mug again. It got so bad with the other two presses, that I actually tried not to sell them(mugs). My customers, however, wished to reorder so I had to find a solution. That solution being the Mug Pro. I wish I had purchased the Mug Pro in the first place. I would have saved a lot of time, money and aggravation. Your press is truly a quality piece of equipment that is well built, engineered and certainly worth the small amount more than the competitor's products."

Don Doyle, Custom Creations, Michigan

"You have a well designed press, and its hard to come up with any suggestions for improvement. We just packed our other press away in the attic. I don't know how we would have coped during our Father's Day rush without your press. If you ever have a testimonial page on your site, I'd be glad to contribute."

Robert Sorrells, Cups 'N Stuff, Alabama

"Just wanted to drop you a quick note to let you know how much we love our Mug Pro press. We have had it for almost a year now and have pressed a couple of thousand mugs or more. We have never regretted our decision to purchase your press. Business is great and your support with every aspect of this industry is a big part of our success."

James D. Reed, Rose in the Woods, California

"I received my Nova Chrome mug press on Friday and let me tell you...it has got to be the Mercedes of mug presses. Even tapered mugs work well! No spray, no water, no mess, no creases, no nothing. Just print, tape and press. And even better, you won't burn your knuckles every time you put the mug in place. What a relief. Thank you Nova Chrome!"

Tony, Pro Tech, Texas
